FLOWER SEED

NOVELTIES FOR 1896

OFFERED BY

WILLIAM BULL, F.L.S.,

NEW PLANT AND SEED MERCHANT,

536, King's Road, CHELSEA, LONDON, S.W.

In ordering FLOWER SEEDS it will be sufficient to QUOTE THE MARGINAL NUMBERS.

ROSA MULTIFLORA, "DWARF PERPETUAL."

1. ## ROSA MULTIFLORA,

"DWARF PERPETUAL."

A new race of Dwarf Fairy or Miniature Roses, flowering in the most profuse manner the same year as sown. The blossoms are of all the colours existing amongst ordinary Roses, some being single, others semi-double, and many completely double of rosette formation. The cultivation and raising of these new dwarf Roses will be found most interesting, some of the plants flowering six or eight weeks after sowing and being of a perpetually flowering character, continue in bloom throughout the season, the little plants becoming covered with a multitude of the most charming flowers. 1*s.* and 1*s.* 6*d.* per packet.

A SINGLE PLANT OF CUPID.—*Grown in a pot, engraved from a Photograph.*

2.

SWEET PEA, CUPID.

This new Sweet Pea is of American origin, and is the dwarfest yet seen, growing only 5 inches high. The flowers are pure white of the same size as the variety *Emily Henderson*, but with more substance in the petals of both wings and standard, than any other Sweet Pea. They are borne in twos and threes on the ends of short stout stems, and emit the same agreeable fragrance as the other well-known kinds. As will be seen from the illustration shown above, it is extremely floriferous, the peculiarly dwarf and compact habit of the plant rendering it especially desirable for cultivation in pots. Plants grown in pots were exhibited before the Floral Committee of the Royal Horticultural Society on the 25th June, 1895, an "Award of Merit" being voted unanimously. Per packet of 20 seeds, 1*s*.

3.

TREE CARNATION, URIAH PIKE.

CARNATION, URIAH PIKE.

This is undoubtedly the finest Crimson Tree Carnation ever offered, it being a glowing velvet-crimson self. The flowers, which are produced abundantly and continuously for a long period, are perfect in form and emit a most powerful and agreeable clove fragrance. It is regarded by Florists as a model and indispensable flower, and is a favourite with everyone. Awarded six First-Class Certificates. 1*s*. 6*d*. and 2*s*. 6*d*. per packet.

4.

CHRYSANTHEMUM CARINATUM,

"PURPLE CROWN."

This new Chrysanthemum is of dwarf, compact growth, with beautiful yellow foliage. Its flowers, produced in great abundance, are purple scarlet, ornamented with a golden yellow ring. 1*s*. 6*d*. per packet.

PRIMULA OBCONICA GRANDIFLORA.

WALLFLOWER, RUBY GEM.

5.

HELIANTHUS CUCUMERIFOLIUS,

"STELLA."

This new annual Sunflower attains a height of 3 to 4 feet, and differs from the *Helianthus cucumerifolius* or Miniature Sunflower by its larger and better formed flowers of the purest golden yellow with a black disc. The individual flowers, 2½ to 3 inches across, are all borne on long stems and rise well above the bright green, small foliage. Sown on a sunny spot in the open ground in April, flowers may be cut daily from the end of June until the frost kills the plants.

1*s.* per packet.

6.

PANSY, "FIERY FACES."

These charming new Pansies are said by the raiser to come quite true from seed. The colour is reddish crimson edged with yellow and small yellow eye, the three lower petals heavily blotched with purple-black. 1*s.* per packet.

7.

PRIMULA OBCONICA GRANDIFLORA.

A large-flowered form of the pretty decorative *Primula obconica*, producing almost continuously large trusses of bloom, the individual flowers measuring from 1 to 1¼ inch in diameter; they are also much deeper in colour than the normal small-flowered type, to which it is infinitely superior. This must not be confounded with varieties offered on the Continent and elsewhere, to which it is not to be compared.

2*s.* 6*d.* per packet.

8.

TROPÆOLUM, LILLIPUT.

A miniature dwarf growing variety of the well-known *Tropæolum Lobbianum*, very distinct from the ordinary *Tom Thumb* Nasturtium, the plants forming neat compact little bunches, completely covered with a profusion of brilliant flowers of all colours.

1*s.* per packet.

9.

WALLFLOWER, RUBY GEM.

This fine Novelty is the most brilliant and effective variety of Single Wallflower hitherto sent out. The colour is a clear shade of ruby violet with a bluish satin-like sheen, and when seen in a mass the effect is most striking. In habit it is bushy, of medium height, the flowers extra large and of good substance. 1*s.* per packet.

SPECIALITIES FOR 1896.

AMARYLLIS.

10. AMARYLLIS.

New Hybrids, very choice. Saved from a collection of exceptionally fine varieties. 2*s.* 6*d.* per packet.

11. ASPARAGUS PLUMOSUS NANUS.

A most elegant and graceful ornamental plant for the greenhouse, extremely useful for cutting and all decorative purposes. 2*s.* 6*d.* per packet.

CROZY'S CANNAS.

12. CANNAS.

CROZY'S GLADIOLUS-FLOWERED STRAIN.

The magnificent varieties of Cannas raised and sent out by M. Crozy, are too well-known and appreciated to need any lengthened description. They are of the greatest value for bedding purposes and flowering when quite dwarf, are admirably adapted for growing in pots for the decoration of greenhouses and conservatories, their showy spikes of flower remaining in full beauty for a length of time, exhibiting a wealth and variety of gorgeous colouring scarcely obtainable in any other class of plant. Some are brilliant yellow, others intense shades of scarlet, orange, salmon, crimson, red, maroon, &c., many being dotted, striped, maculated or rayed with yellow or scarlet, others again being crimson or scarlet, margined with a band of golden yellow; the flowers indeed are most diversified and pleasing in every way.

Mixed Seed, saved from Crozy's new varieties. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

For dormant roots, *vide* page 73.

13. CHRYSANTHEMUM JAPONICUM IMPERIALE.

LARGE-FLOWERING IMPERIAL JAPANESE CHRYSANTHEMUM.

The Seed now offered has been received from Japan, and may be expected to produce blooms of gigantic size, of smooth, downy or twisted petals, and of almost all colours except blue. Some are almost black, others pure white; others again are of the tenderest pink and carnation, besides many charming shades in yellow, brown, bronze and other brilliant hues. Fine mixed Seed, 1*s.* 6*d.* per packet.

14. CONVOLVULUS MAJOR FL. PL.

DOUBLE-FLOWERED MORNING GLORY.

A double-flowered form of the well-known and popular Convolvulus major or Morning Glory. Like the type, it is of rapid growth, and freely produces its double flowers, which somewhat resemble in form those of *Calystegia pubescens fl. pl.* They are white with a slight spot of red or of blue at the base of the larger petals. About 80 per cent. are reproduced true from Seed.

6*d.* per packet.

15. DATURA CORNUCOPIA.

A very interesting and beautiful novelty, which will succeed admirably in a greenhouse. The flowers are produced when the plants are only a few inches high, the blossoming period extending all through the Summer. The individual blooms are semi-erect and of immense size, attaining on well grown plants, nearly a foot in length. The inner surface of the funnel-shaped tubes is of a French white, while the outside is marmorated and suffused with bright purple. To add to their great beauty the flowers are deliciously scented.

1*s.* per packet.

16. DIANTHUS LACINIATUS,

"SALMON QUEEN."

This pretty new variety produces in great profusion, handsomely fringed and laciniated flowers of the most brilliant salmon colour imaginable, changing into a lovely salmon rose. The plants attain a height of 10 to 12 inches, and will be found of the greatest use for planting in beds and borders, the flowers being very showy and most useful for cutting.

1*s.* per packet.

17. ## LOBELIA, BARNARD'S PERPETUAL.

This splendid acquisition sent out by Mr. William Bull, is without doubt the finest Lobelia yet raised. The flowers are of the most brilliant ultramarine blue, strikingly ornamented with a pure white marking at the base of each of the two lower petals. It is of compact habit, and alike useful for bedding or growing in pots, while the bright and effective colouring of its flowers, combined with its perpetual blooming character, renders it most desirable for beds and ribbon borders. It was awarded a Certificate of Merit by the Royal Horticultural Society when exhibited in May, 1892, at the Temple Show.

6*d*. per packet.

MIGNONETTE, GOLDEN GEM.

18. ## MIGNONETTE, GOLDEN GEM.

A beautiful dwarf-growing Mignonette, of compact and regular pyramidal growth, producing an abundance of spikes of a rich golden-yellow colour. It is of the greatest value either for growing in pots for general decoration, or sown in the open borders for cutting purposes. *Vide* illustration.

6*d*. per packet.

19. ## NEMESIA STRUMOSA SUTTONI.

The flowers of this pretty and distinct half-hardy plant range from ivory white to primrose, orange scarlet, crimson and purple, flowering in the open air all through the Summer. 1*s*. per pkt.

20. ## SAINTPAULIA IONANTHA.

A distinct and pretty greenhouse plant, producing an abundance of Violet-like flowers on slender stalks. The blossoms are of a violet blue colour, with golden yellow stamens. A most charming and desirable plant, which cannot fail to become a general favourite. 1*s*. & 1*s*. 6*d*. per pkt.

POLYANTHUS-PRIMROSE, HARDY HYBRIDS.

21. POLYANTHUS-PRIMROSE, HARDY HYBRIDS.

These beautiful hardy hybrid Primroses produce a profusion of large flowers of many bright and brilliant colours. In a mild season they will often commence blooming in the Autumn, and continue through the Winter.

1*s.* per packet.

22. TEN-WEEK STOCK, "PRINCESS MAY."

A handsome variety, bearing large spikes of light primrose-coloured flowers. The individual blossoms, when fully expanded, attain a diameter of two inches, the glossy green of the foliage showing off the delicate hue of the flowers to the best advantage. One of the earliest to flower.

1*s.* 6*d.* per packet.

STOCK, "PRINCESS MAY."

23. STREPTOCARPUS. New Hybrids.

These handsome hybrids are admirably adapted for greenhouse and conservatory decoration, their pretty trumpet-shaped flowers being produced in the utmost profusion through the Summer and early Autumn months. The value of these charming flowering plants is greatly enhanced by their great diversity of colour, which ranges from pure white to deep rose and violet-purple.

2*s.* 6*d.* per packet.

24. TECOMA SMITHII.

One of the finest Seed Novelties yet introduced, and an exceedingly beautiful addition to our Autumn and Winter flowering greenhouse plants. The flowers are tubular in shape, about 2 inches long, and about 1 inch in diameter at the month, of a rich lemon colour shaded with dark orange, borne in large terminal corymbiform heads, presenting a most charming appearance, and lasting in full beauty for upwards of a month.

The plant is very easily grown, in fact, is as easily managed as a Chrysanthemum. Was awarded a First-Class Certificate by the Royal Horticultural Society.

1*s.* 6*d.* and 2*s.* 6*d.* per packet.

PRIMULAS.

Special Offer of Seed

from Prize Strains.

25. **PRIMULA SINENSIS FIMBRIATA ALBA.** 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

26. **PRIMULA SINENSIS FIMBRIATA RUBRA,** 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

27. **PRIMULA SINENSIS FIMBRIATA, RED AND WHITE, MIXED,** 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

MR. WILLIAM BULL has the greatest confidence in offering Seed of the above, knowing that the produce cannot be excelled, it having been saved from the finest strains in cultivation, the flowers being remarkable for size, brightness of colour, and substance, while in general habit the plants leave nothing to be desired.

28. ## PRIMULA SINENSIS FIMBRIATA.

"PREMIER MIXTURE."

Seed of MR. WILLIAM BULL'S select strain is offered in mixture, containing all the new and most distinct colours and varieties; the many unsolicited testimonials received point conclusively to the fact of its being appreciated as of unusual excellence. To distinguish this from the ordinary mixture of *P. alba* and *rubra* generally supplied, Mr. W. B. designates this choice mixture as above. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

FERN-LEAVED PRIMULAS.

Sow Aster seed in April and May, in pans, or on a spent hot-bed in drills 6 inches asunder; when the plants are 1 inch high, prick out into a cold frame, or under hand-glasses, 3 or 4 inches apart, from whence they can be planted out when 4 inches high. Select showery weather for planting out, when the ground is in good working order; plant in rows 1 foot apart each way. To grow Asters to perfection, a rich soil is indispensable, and during dry weather they should be watered, and a top-dressing of well-rotted manure applied early in August.

STOCKS.

EAST LOTHIAN STOCK.

These Stocks are, without exception, the finest ever offered, the colours being crimson, scarlet, purple, and white, of remarkable brilliancy in the three former, and purity in the latter. The flowers are very double, produced on immense spikes. If grown in a rich soil they will keep up a succession of bloom from July until the end of November, after which the plants may be potted and kept to make a further display during the following summer.

TIME OF SOWING.

HARDY ANNUALS may be sown in March and April (and for early spring blooming in August and September), in a sheltered situation, and when up, thinned so as to keep them strong. In March they may be transplanted where they are to bloom. Before sowing, which should be done on a fine dry day, carefully prepare the soil, and in covering, regulate the thickness by the size of the seeds—small seeds should be very lightly covered. Success in growing annuals depends in a great measure upon their being properly thinned to regular distances, so as to give plenty of room for the full development of each plant; this, in too many instances, is entirely neglected, hence the dissatisfaction so often expressed as to their use.

HALF-HARDY ANNUALS may be sown in March and April, in pans, placed on a slight hot-bed, and, when strong enough, pricked out into a cool frame near the glass, where they may get hardened and well established for transplanting into their blooming quarters early in May, or potted off singly for conservatory and greenhouse decorations. Under favourable circumstances many varieties will bloom freely if sown in the open ground about the middle of May.

TENDER ANNUALS such as Balsams, Celosias, Thunbergias, &c., require raising in a temperature ranging from 60° to 70°. Sow in pans or pots, and place near the glass; keep the soil moist, and shade from the sun until the plants appear. When strong enough, pot off into small pots, keeping them near the glass, and admitting air on every favourable occasion.

BIENNIALS AND PERENNIALS.—The more select and tender varieties for summer and autumn blooming may be sown in a gentle heat in March and April, and pricked out into pots until fully established, and then potted off singly, or transplanted into the open ground, as required. The hardier varieties may be sown in the open ground, in prepared beds, in June and July, and when strong enough transplanted into nursery beds, or where they are intended to bloom the following year.

In ordering Flower Seeds it will be sufficient to quote the marginal numbers.

CHOICE COLLECTIONS OF FLOWER SEEDS.

As in Flower Seeds new species or varieties and improved strains are being constantly imported, proved, or raised, and offered by Mr. William Bull, it naturally follows that giving mere names and descriptions convey in many instances but an inadequate idea of the desirability of some of the handsomest and best introductions. Collections of Flower Seeds are therefore made comprising the choicest strains of popular favourite flowers, and including selections of the best novelties.

Quality rather than quantity being especially considered—Mr. W. B.'s selections may safely be relied on in these Collections.

SELECT GENERAL LIST OF VEGETABLE SEEDS.

In the following General List of Vegetable Seeds, Mr. WILLIAM BULL has excluded all varieties of doubtful origin and quality, only the most distinct and useful varieties in each section being quoted. The Stocks of all seeds have been carefully selected from the most eminent cultivators at home and on the Continent, and their growth having been effectually tested, they are confidently offered as being the very best that can be procured.

ARTICHOKES.

Sow early in March, in rich soil, and when strong enough plant in rows 4 feet apart, and 30 inches from plant to plant.

	Per pkt.—s.	d.
GREEN GLOBE	0	10
PURPLE GLOBE	0	10

ASPARAGUS.

During the third week in March, sow the seed in drills 12 or 15 inches apart, on well-drained light ground that has been heavily manured the previous autumn; the seed may be covered to the depth of half an inch. Thin out to 18 inches apart.

ASPARAGUS, CONNOVER'S COLOSSAL.

MELON—BISHOP'S FAVOURITE.

NEW MELON.

BISHOP'S FAVOURITE.

Award of Merit Royal Horticultural Society, June 25th, 1895.

This magnificent New Melon has been raised by Mr. Bishop, Westley Hall Gardens, Bury St. Edmunds, and is the result of a cross between "Longleat Perfection" and "Golden Perfection."

Per packet, 1*s.* 6*d.*

The following is the raiser's description:—

"This Melon is very handsome in appearance, being beautifully netted, with a magnificent golden-yellow skin; it has a white flesh of great depth, remarkably tender, with a most luscious flavour, the fruit reaching 6 and 7 lbs. in weight. I have grown it over four years, and find its constitution most vigorous and robust. I feel confident it will become one of the standard varieties."

"THE GARDEN," in announcing the Award of Merit to the above excellent Melon, says:—

"MELON—BISHOP'S FAVOURITE.—A white-fleshed fruit, above medium size, with a good depth of flesh, very sweet and well flavoured."

OPEN AIR.—THE EARLIEST TOMATO. Can be sown, grown and ripened in the open. Tried by the Royal Horticultural Society at Chiswick, and received XXX for First-class Certificate as the earliest of 81 varieties from various climes and countries to ripen in the open. This Tomato has been selected for its earliness, hardiness, and adaptability for outdoor growth, and as the best disease resister. It has large, handsome, smooth fruits of a brilliant vermilion-scarlet colour, which do not crack, and are freely produced on strong woody stems of medium height. The quality and flavour are both excellent. 1*d.* per packet.

BULL'S FOOD FOR PLANTS.

Contains in a concentrated form all the essential elements of plant life. It is of immense benefit applied as a top-dressing to plants and bulbs of all sorts grown in pots, especially when pot-bound, completely restoring exhausted energy, a few applications ensuring vigorous healthy growth, the flowers being produced in a most luxurious manner, combined with great richness of colouring. It can also be mixed with ordinary soil in potting, or may be used with most beneficial effect for Chrysanthemums, Shrubs, Vines, and all kinds of Fruits, whether in pots or planted in the open air.

FOR TESTIMONIALS see next page.

ANALYSTS' REPORT.

The analysis shows this to be a complete Plant Food, and of the highest quality. The material not only contains an abundance of all the constituents necessary for plant growth, but the analysis shows also that the four chief constituents are each in that combination which renders them in the most beneficial and available form for the healthy development of plants.

For these reasons, users of this Plant Food in the proper quantities cannot fail to produce the very best results within the capability of their plants.

CANNON & NEWTON,
Analytical and Consulting Chemists, 39, Mincing Lane, London, E.C.

DIRECTIONS FOR USE.

For POT PLANTS AND BULBS.—Sprinkle on the surface of the soil, about every three weeks, at the rate of a small teaspoonful to a 5-inch pot, so that when the plants are watered, the Plant Food will be gradually absorbed into the soil.

For CHRYSANTHEMUMS.—At the time of potting, some of the Plant Food should be thoroughly mixed with the compost, and afterwards, when the buds begin to swell, frequent top-dressings should be given, the quantity used being estimated according to the size of the pots and vigour of the plants.

For ROSES, SHRUBS, VINES, &c., in Pots.—Use about a tablespoonful to a 12-inch pot several times during the season.

For PLANTS, FRUITS, ROSES, and all Plants in Borders and the Open Ground.—Apply about 2 ozs. to the square yard as often as occasion may require, raking and watering it in.

For LAWNS.—Scatter broadcast at the rate of 2 ozs. to the square yard, and well water.

Sold in Tins, containing about 1½ lbs., price 1s. each. Larger Size, containing about 5 lbs., 2s. 6d. each.

Also in Bags, 14 lbs., 4s. 6d.; 28 lbs., 7s. 6d.; 56 lbs., 12s. 6d.; 112 lbs., 20s.

BULL'S FOOD FOR PLANTS.

TESTIMONIALS.

MORNINGSIDE NURSERY, EDINBURGH, *August 15th*, 1895.

Dear Sir,—Please send us on three bags of your Plant Food Manure. We are finding it to do good work.

Yours truly, J. & A. SETH.

BISHOP'S BUNTON HALL, BEVERLEY, *6th August*, 1895.

Dear Sir,—I have tried your Plant Food with great success. I consider it the best Plant Food in the Market, its effects are marvellous. Please send me another cwt.

Yours respectfully, JAMES SMART, Gardener to E. R. B. Hall-Watt, Esq.

THE GARDENS, MOUNT MERRION, BOOTERSTOWN, DUBLIN, *4th December*, 1894.

Sir,—I am well pleased with your Plant Food. I grew my Chrysanthemums this year with it, and won four First Prizes, one £20 Cup, and one £10 Cup at the Dublin Show.

Yours truly, HUGH CRAWFORD, Gardener to the Rt. Hon. Earl of PEMBROKE.

CROFTON, AIGBURTH, LIVERPOOL, *20th February*, 1894.

Dear Sir,—After giving your Food for Plants a fair trial for over two years, I must say that I like it better than any Artificial Manure I have ever used. In 1892 I grew my Chrysanthemums with it, which won the 10-Guinea Cup at Grassendale and Aigburth Shows, also the First Prize at Liverpool. In 1893 I was again successful in carrying off like honours. I have used it on hard and soft wooded plants, and the results were everything that could be desired. It has no unpleasant odour, so that, unlike many Manures, is not offensive in the Conservatory.

Yours truly, DONALD FORBES.

HARKSTEAD RECTORY, near IPSWICH, *May 10th*, 1894.

Dear Sir,—Having used your Plant Food on Chrysanthemums with such good results, I have no hesitation in saying that it is the best Artificial Manure I have ever used, producing flowers of great size and depth, indeed, it is invaluable to those who have to exhibit blooms of the finest quality. One thing greatly in its favour is, that if applied in moderation, anyone may use it without running the risk of injuring the roots or the flowers damping, which is often the case with other Manures.

I am, Sir, yours respectfully, GEORGE JORDAN, Gardener to the Rev. HUGH BERNERS.

IMPNEY HALL, DROITWICH, *13th February*, 1893.

Dear Sir,—I am very pleased with the results from using your Plant Food. I grew my Chrysanthemums with it last season, which won the City of Edinburgh Silver Cup, also the three First Prizes for cut-blooms in the large Open Classes at Birmingham, and the First Prizes at Sheffield. I have also used it with excellent results for Strawberries, Melons, Pines, &c. I am now using it on Vine and Peach Borders with every confidence of its producing good results. I shall be glad if you will kindly forward another 5 cwt. and oblige,

Yours truly, RICHARD PARKER, Gardener to J. CONNETT, Esq.

CROSWOOD PARK, ABERYSTWITH, *17th March*, 1894.

Dear Sir,—I am delighted with your Food for Plants. I find it is excellent for Chrysanthemums, Pelargoniums, Fuchsias, Cinerarias, &c., in fact for all soft wooded plants. I also used it on my Vine borders and it enabled young Vines to carry remarkably heavy crops that ripened up well, while the flavour was everything that could be desired. A great advantage is that it has no unpleasant smell, so can be used in the Conservatory.

I am, yours faithfully, R. C. WILLIAMS, Gardener to Rt. Hon. Earl of LISBURNE.

OAKLANDS, AIGBURTH, LIVERPOOL, *12th March*, 1894.

Dear Sir,—I have much pleasure in stating that I have used your Food for Plants with great success on Vines, Peaches, Roses, &c., in fact I never had better results. For hard and soft wooded plants I can confidently recommend it as a safe and excellent Fertilizer. Yours truly, JOHN BOUNDS, Gardener to ALFRED L. JONES, Esq.

THE GARDENS, KEIR, DUNBLANE, BRIDGE OF ALLAN, N.B., *8th September*, 1893.

Dear Sir,—Your Plant Food is the best I have ever used. I have tried it on various plants with excellent effect, and for stimulating and imparting colour to Crotons and other foliage plants, it is all that can be desired. I tried it on Cyclamens, and the results were marvellous. I took First Prize with these at Edinburgh last year. Kindly send me double the quantity, obliging

Yours truly, THOMAS LUNT, Gardener to ARCHIBALD STIRLING, Esq.

MANOR HOUSE, STRATTON AUDLEY, BICESTER, *9th November*, 1893.

Dear Sir,—I have used your Food for Plants for nearly two years, and like it better than any artificial Manure I have ever had. I have used it on my Vines and never had such a good crop. It is excellent for Chrysanthemums, Primulas, Ferns, &c. Please forward me another cwt., and oblige.

Yours faithfully, W. PARKER, Gardener to the Right Hon. Lady ROSE LEIGH.

ST. ANNE'S, CLONTARF, DUBLIN, *2nd March*, 1893.

Dear Sir,—I have used many Artificial Manures for plants in the past 36 years, but none that I like so well as your "Plant Food." Not only is it a quick Fertilizer, but it has no unpleasant odour—a great desideratum.

Yours faithfully, CHARLES SMITH, Gardener to the Right Hon. Lord ARDILAUN.

THE DEN, BELFAST, *27th January*, 1893.

Dear Sir,—You will doubtless be interested to know that last season I won twenty-three First and ten Second Prizes for plants and fruit grown with your Food for Plants, which has proved a most excellent stimulant, and is certainly the best Manure I have ever used. It is cleanly to use, creates no fungus, and has no unpleasant odour; in fact, no gardener should be without it. Please send me another cwt. and oblige,

Yours truly, WM. McILROY, Gardener to G. W. WOLFF, Esq.

LEIGHTON GARDENS, WELSHPOOL, *7th January*, 1892.

Now that I have used Mr. William Bull's Food for Plants over twelve months, I have very great pleasure in stating that I believe it to be the best Plant Manure in the market. It produces fine foliage, large flowers, and gives a good healthy appearance to Stove and Greenhouse Plants in general. I have also used it on Melons, Cucumbers, Tomatoes and Vines with good results, and it is excellent for Chrysanthemums.

WILLIAM ROTHWELL, Gardener to Mrs. NAYLON.

THE NURSERY, LOWTON, NEWTON-LE-WILLOWS, *15th December*, 1893.

Dear Sir,—Please send me 5 cwt. of your Plant Food at your earliest convenience. I must say it is the best Fertilizer I have tried on soft-wooded Plants, especially for Chrysanthemums and Pelargoniums.

Yours truly, JOSEPH LEIGH.

FORDE ABBEY, CHARD, *27th January*, 1894.

Dear Sir,—I think most highly of your Plant Food. It is splendid for all kinds of pot-stuff, and especially that which needs a strong Manure. It is grand for Chrysanthemums and all kinds of Winter-blooming plants.

Yours truly, JOHN CROOK, Gardener to W. H. EVANS, Esq.

For Full Particulars see preceding page.

GLADIOLUS.

(HYBRIDS OF GANDAVENSIS.)

There are few flowers more showy and beautiful than the Gladiolus, and the varieties of the *Gandavensis* section are perfectly hardy and easily grown, whilst their erect and stately growth, and long spikes of flowers, developing themselves successively, never fail to win admirers.

To facilitate the cultivation of this highly decorative plant, a few remarks may be necessary to some:—

The best and safest time for planting is from the beginning of April to the end of May, when a continuous bloom may be assured from July to September.

Soil is not much a point for consideration, so long as it is not stiff and consolidated; but it is important that it should be deeply dug previous to planting.

Large bulbs should be planted from 3 to 4 inches, and smaller bulbs 2 inches deep.

During excessively dry weather, copious waterings are recommended.

When any bulbs show signs of growth before the time mentioned above, they should be potted and kept in a cool frame until the proper season for planting out.

LEMOINE'S GLADIOLUS.

This beautiful tribe of plants should be largely planted everywhere.

Orders are booked throughout the year at the following prices, and the bulbs supplied in January, February, or March.

GANDAVENSIS, Finest Mixed Hybrids.

The flowers of these magnificent hybrids are of great beauty, possessing great diversity of colour, many being striped and splashed in the most handsome manner. Invaluable for cutting.

Various colours, 12*s.* 6*d.* per 100; 1*s.* 9*d.* per dozen.

LEMOINE'S HARDY SPOTTED HYBRIDS.

These Gladiolus are of the easiest culture, and succeed in every soil. The flowers of this new race are of large size, perfect shape, and the most beautiful colours.

Finest mixed blotched varieties, 1*s.* 6*d.* per doz.; 10*s.* per 100.

Finest named varieties, 3*s.* 6*d.*, 5*s.* & 7*s.* 6*d.* per doz.

LEMOINEI.

A handsome hybrid early-flowering variety. 3/6 per doz.

MARIE LEMOINE.

Exceptionally beautiful. Should be planted largely.
1*s.* 6*d.* per dozen; 10*s.* per 100.

BRENCHLEYENSIS.

This beautiful and showy bright scarlet species is most effective when planted in quantity in beds or borders.
Selected bulbs, 6*s.* 6*d.* per 100, or 60*s.* per 1,000.

SNOW-WHITE.

A magnificent White Gladiolus, with large and elegantly formed flowers of great substance slightly shaded with cream, a faint line of purple extending half-way through the lower petal. 15*s.* per doz.

AMARYLLIS BELLADONNA.

AMARYLLIS.

This deservedly popular family cannot be too highly recommended. The ease with which they are cultivated and the gorgeously beautiful flowers they produce at almost any season, make them most desirable in any collection. By gradually drying the bulbs they can be put to rest at any time during the year, and then, when required, if started in a gentle heat, they quickly develop their large Lily-like blossoms, which are of various colours, generally embracing crimson, white and red, scarlet, rose-flaked, striped white and crimson, with various shades of colours.

Choice selections of good sorts, 2, 3, 4 and 6 guineas per dozen.

For Seed of Choice Amaryllis, *vide* page 4.

AMARYLLIS BELLADONNA.

(The Belladonna Lily.)

These beautiful hardy bulbs have large handsome blush flowers, richly flushed with rosy purple, rendering them extremely useful for greenhouse and conservatory decoration. 6*s.* and 9*s.* per dozen; 40*s.* to 60*s.* per 100.

AMARYLLIS FORMOSISSIMA.

AMARYLLIS IGNESCENS.

This distinct and ornamental species is one of the most handsome of stove bulbs. It is very free-blooming, and bears on erect scapes umbels of fiery orange-scarlet flowers. 2*s.* 6*d.* and 3*s.* 6*d.* each. 24*s.* and 36*s.* per dozen.

AMARYLLIS LUTEA.

(Sternbergia lutea.)

A beautiful rich golden yellow flowering species, blooming in the autumn. 1*s.* 6*d.* per dozen; 10*s.* 6*d.* per 100.

AMARYLLIS FORMOSISSIMA.

A very handsome bulbous plant, freely producing magnificent flowers of a very rich dark velvety crimson. This distinct and attractive Amaryllis is very suitable for growing in pots, and is always interesting, owing to the rich colour and peculiar shape of its flowers. *Vide* illustration. It will succeed well in a warm greenhouse. 6*d.* each; 5*s.* 6*d.* per dozen.

ANTHERICUM LILIASTRUM MAJUS.

ANTHERICUM LILIAGO (*St. Bernard's Lily*), white, 2*s.* 6*d.* per dozen.
—— —— **MAJUS**, 9*d.* each; 7*s.* 6*d.* per dozen.

—— —— **MAJUS**, 1*s.* and 1*s.* 6*d.* each; 10*s.* and 15*s.* per dozen.

CYCLAMEN AFRICANUM.

CYCLAMEN PERSICUM.

Too much can scarcely be said in favour of the superb varieties of this plant, of which the old *C. persicum* is the type, whether they are regarded as objects for the ornamentation of the greenhouse or conservatory, or for table decoration, for which their compact floriferous character eminently fits them. The flowers are also extremely useful for bouquets, and when plucked, if kept in water, they will last in freshness and beauty some weeks. 9*s.*, 12*s.* and 18*s.* per dozen. Flowering plants, 24*s.*, 30*s.* and 42*s.* per dozen.

CYCLAMEN AFRICANUM, a handsome, hardy species, with large ornamental leaves. Flowers bright reddish crimson. *Vide* illustration. 1*s.* each; 10*s.* per dozen.

CYCLAMEN EUROPÆUM, red, sweet scented, quite hardy (*vide* illustration), 4*s.* per dozen.
—— **COUM**, bright red, 6*s.* per dozen.
—— **HEDERÆFOLIUM**, 6*s.* per dozen.

CYCLAMEN EUROPÆUM.

IRIS.

IRIS KÆMPFERI.

IRIS GERMANICA OR EVERGREEN.

The handsome hybrids of this beautiful section are of the greatest use for the adornment of beds and borders; the flowers are of rich and varied colours, and striped or blotched with purple and violet, on a white or yellow ground.

Choice mixed varieties, per 100, 8*s.* 6*d.*; per dozen, 2*s.*

Assortment of 50 in 25 choice varieties, 24*s.* and 30*s.*

Assortment of 25 in 12 choice varieties, 12*s.* and 15*s.*

Assortment of 12 in 12 choice varieties, 4*s.*, 6*s.*, 9*s.* and 12*s.*

IRIS KÆMPFERI.

Many magnificent varieties of this handsome and attractive plant have been imported from Japan; indeed scarcely any plants in the flower garden can compare for gorgeous beauty with this section of Iris. Varying in colour from pure white to rich maroon-crimson, there are few flowers surpassing them in size and the brightness of their colouring. They succeed admirably planted on the margin of a lake or pond, or in any situation where plenty of moisture can be given. 2*s.* 6*d.* and 3*s.* 6*d.* each; 24*s.* and 36*s.* per dozen. Choice varieties, 5*s.* and 7*s.* 6*d.* each. Mixed Seedlings, 7*s.* 6*d.* and 10*s.* 6*d.* per doz.

IRIS PUMILA.

PUMILA ATROCÆRULEA.—Rich violet-purple. Per 100, 10*s.* 6*d.*; per dozen, 2*s.*

—— **CÆRULEA.**—Beautiful sky-blue. Per 100, 10*s.* 6*d.*; per dozen, 2*s.*

—— **LUTEA.**—Bright yellow. Per 100, 10*s.* 6*d.*; per dozen, 2*s.*

These charming Iris grow 6 to 9 inches high, and flower during the months of March, April, and May. They succeed almost in any soil and situation, and are especially valuable for groups in mixed Borders.

SPIRÆA ASTILBOIDES.

SPIRÆAS.

SPIRÆA ASTILBOIDES.—One of the most handsome of hardy herbaceous perennials, which cannot be too highly appreciated as a decorative plant for early forcing. Certificated both by the Royal Horticultural and Royal Botanic Societies. The inflorescence consists of compound feathery branches of elegant white flowers. It is a charming and indispensable plant for pot culture, its beautiful flowers being produced in the greatest profusion. 9*d*., 1*s*. and 1*s*. 6*d*. each; 7*s*. 6*d*., 10*s*. and 15*s*. per dozen.

SPIRÆA ASTILBOIDES FLORIBUNDA. Produces thyrsoid spikes of bloom, much crowded with flowers. 1*s*. 6*d*. each; 15*s*. per dozen.

SPIRÆA (HOTEIA) JAPONICA.—Most useful for decorative purposes. *Strong clumps*., 5*s*. per dozen.

SPIRÆA JAPONICA AUREO-RETICULATA.—Pretty variegated foliage, added to which it bears a profusion of handsome compact spikes of pure white flowers. 9*d*. each; 7*s*. 6*d*. per dozen.

SPIRÆA JAPONICA COMPACTA MULTIFLORA.—This most desirable variety is a great improvement on the old *S. japonica*, as it produces a profusion of large and dense spikes of pure white flowers, in telling contrast to the dark green foliage of the plant, the habit of which is dwarf and compact. 6*d*. each; 4*s*. 6*d*. per dozen.

SPIRÆA PALMATA.—The bright pink Spiræa, one of the most beautiful hardy plants in cultivation, producing lovely broad corymbs of pink flowers. It is a native of Japan. 6*d*. each; 4*s*. 6*d*. per dozen.

SPIRÆA PALMATA ALBA.—A counterpart of *S. palmata*, except in the colour of the flowers, which are pure white; a very beautiful and elegant variety. 9*d*. each; 6*s*. per dozen.

TIGRIDIAS.

CONCHIFLORA, home grown; yellow, spotted with purple. 1*s*. 6*d*. per dozen; 10*s*. 6*d*. per 100.

GRANDIFLORA (*speciosa*), home grown. 1*s*. 6*d*. per dozen; 10*s*. 6*d*. per 100.

—— **ALBA**, home grown; beautiful white-flowered variety. 1*s*. 6*d*. per dozen; 10*s*. 6*d*. per 100.

BRACHYCERAS. 2*s*. 6*d*. each.

PENTAPHYLLUM. 1*s*. 6*d*. each.

POLYPHYLLUM. 6*d*. each; 4*s*. per dozen.

SPECIOSUM.—Handsome crimson flowers. 6*s*. per dozen.

TRICOLOR GRANDIFLORUM (Jarattii). 6*d*. each.

TUBEROSUM.—Flowers scarlet and yellow; a very attractive and decorative species for open-air cultivation. 3*s*. per dozen; 4*d*. each.

SINGLE-FLOWERED BEGONIA.

DOUBLE-FLOWERED BEGONIA.

BEGONIAS.

HANDSOME FLOWERED TUBEROUS-ROOTED SECTION.

The immense size to which the flowers of this popular race of plants have now attained considerably enhances their value for decorative and bedding purposes. Of nearly every shade of colour, from deepest crimson-scarlet to white, the blooms are produced in the utmost profusion, thus rendering them extremely showy and attractive.

SINGLE-FLOWERED.

Selections of good single-flowering named varieties can be made by Mr. W. B. at 12s., 18s. and 24s. per dozen.

Single-flowered unnamed Seedlings of various colours, 4s., 6s. and 9s. per dozen; 25s., 35s. & 50s. per 100.

For Seed: *vide* page 11.

DOUBLE-FLOWERED.

Named Varieties with double flowers, at 30s., 42s. and 60s. per dozen.

Double-flowered unnamed Seedlings of various colours, 4s., 6s., 9s. and 12s. per dozen; 30s., 35s., 50s. and 75s. per 100.

DOUBLE TUBEROSES

(POLIANTHES TUBEROSA.)

The perfectly double flowers of *Polianthes* are well known for their delicious fragrance and pearly whiteness, being admirably adapted for Button-holes, Bouquets, &c.; indeed, are of the greatest value wherever cut flowers are required. By successional plantings these lovely flowers may be had all through the summer and autumn. They should be potted in rich loamy soil and started in a good bottom heat, being afterwards grown on in a stove, with plenty of moisture.

DOUBLE AMERICAN.

Selected bulbs, 2*s*. 6*d*. per doz.; 15*s*. per 100.
Finest picked bulbs, 20*s*. per 100.

DOUBLE AMERICAN.

"THE PEARL."

Selected bulbs, 2*s*. 6*d*. per doz.; 15*s*. per 100.
Finest picked bulbs, 20*s*. per 100.

The above can be supplied about the end of December.

AFRICAN.

These can be supplied in fine bulbs in October and November.

2*s*. 6*d*. per doz.; 15*s*. per 100.

CHOICE GLOXINIAS.

The handsome and showy flowers of these beautiful bulbous plants render them of the greatest value for the decoration of stoves and conservatories. Of easy culture, they can, with judicious treatment, be had in bloom at almost any season of the year; their attractive flowers, being of large and good shape, are admirably adapted for cutting. The colours are most varied, every hue being pure and distinct, while some of the kinds are spotted and maculated in a most pleasing manner.

Choice selections made by Mr. W. B at 18s., 24s. and 30s. per dozen, according to sorts.

GLOXINIA.

Good blooming tubers, unnamed, of various colours, raised from handsome varieties, 4s., 6s. and 9s. per dozen; 30s., 40s. and 50s. per 100.

GLOXINIA, SPARKLER.

A handsome variety with rich bright crimson flowers. 1s. 6d. each; 12s. per dozen.

TYDÆAS.

These can be cultivated so as to produce an abundance of bloom throughout the winter, their flowering season principally depending on the time of year their tubers are started into growth. With a little management a succession of blooming plants can be had nearly throughout the year. 18s., 24s., 30s. and 42s. per dozen, according to sorts.

PANCRATIUM ZEYLANICUM.

PANCRATIUM ZEYLANICUM.

An exceedingly attractive dwarf-growing stove species, bearing large pure white flowers, very deliciously scented. As will be seen by the illustration, the corona is funnel-shaped and deeply serrated on the margin, from which the filaments arise and incurve towards the centre. The petals being gracefully recurved lend an additional charm to the flowers of this desirable species. 2*s.* 6*d.* each; 24*s.* per dozen.

PANCRATIUMS.

AMŒNUM, sweet-scented white flowers. 3*s.* 6*d.* each.

CARIBBÆUM, a distinct and beautiful species from the West Indies, flowers pure white, very fragrant, and most useful for cutting for bouquets and other decorative purposes. 2*s.* 6*d.* & 3*s.* 6*d.* each.

EXPANSUM, a fine white-flowered species, beautifully scented. 7*s.* 6*d.* each.

FRAGRANS, beautiful heads of snow-white flowers, deliciously fragrant. 3*s.* 6*d.*, 5*s.* & 7*s.* 6*d.* each.

GUIANENSE, white flowers, the segments prettily curled and twisted. 7*s.* 6*d.* and 10*s.* 6*d.* each.

***ILLYRICUM,** almost hardy. 1*s.* each; 10*s.* per dozen.

MACROPHYLLUM, fine large white flowers, deliciously scented. 10*s.* 6*d.*, 15*s.* and 21*s.* each.

***MARITIMUM,** nearly hardy, beautiful white flowers. 9*d.* each; 7*s.* 6*d.* per dozen.

***PARVIFLORUM,** heads of pretty white flowers, tinged with green on the exterior. Will grow in a greenhouse. 1*s.* each; 10*s.* per dozen.

SPECIOSUM, large sweet-scented white flowers. 5*s.* and 7*s.* 6*d.* each.

With the exception of those marked * all the above require Stove culture.
